Multimodal Transportation Management and Supply Chain Execution
Who We Are

Kewill is a global leader in multimodal transportation management software, providing organizations with a comprehensive end-to-end platform for managing the complexities of transportation, logistics and trade compliance. The Kewill MOVE™ platform helps companies reduce costs, manage volatility and gain greater visibility across the logistics value chain. Trade, transport, store, comply, manage and integrate — the Kewill transportation management platform gives you the insight, agility and tools you need to deliver better customer service and streamline global supply chain execution for strategic advantage.

The Kewill platform supports supply chain execution activities for more than 7,500 companies in over 100 countries.

If you would like to achieve greater efficiency and innovation in your transportation management and logistics functions, Kewill has the expertise and on-premises, SaaS and Cloud solutions you need to achieve your goals.

"Kewill effectively provides the glue and string behind our supply chain operations, a combination of vital components that work together to form a sound foundation to trading." — MOTHERCARE
Get a single platform to monitor, manage and improve your global logistics network for multimodal transportation and warehousing.

Your global supply chain is complex, dispersed and multi-faceted, yet your ability to manage it effectively is critical to the success of your business operations. Imagine the power of gaining visibility and control across your global logistics network for multimodal transportation and warehousing – a common view and tools to manage it all. The digital world is making the dream of supply chain execution convergence more real.

Kewill makes it possible by delivering a single platform comprised of software modules to support the trade, transport, store, comply, manage and integrate functions. The Kewill MOVE™ platform gives you levels of global visibility and control you never thought possible.

**Transport**
Benefit from multimodal transportation expertise and functional capabilities that are unmatched. More effectively manage air, sea, rail and road requirements for full-load, less than truckload, pallet and parcel deliveries on a local, national, regional or global scale.

**Store**
Improve the efficiency of warehouse management and inventory management processes. Provide inventory visibility to suppliers and customers and connect to wireless technology to improve operator productivity.

**Comply**
Actively manage customs and trade compliance and stay informed of changing trade regulations around the world. Kewill provides connections to a multitude of different local customs applications – removing the burden from you.

**Manage**
Gain a holistic view of your logistics network with end-to-end visibility across critical supply chain execution processes. Dashboards, KPIs and proactive alerting will change the way you manage your supply chain.

**Integrate**
Improve external collaboration and B2B integration with critical trading partners by removing the geographic and technical constraints that hinder your efficiency.

**Trade**
From order-to-invoice and from full container to parcel, manage global, regional and local logistics shipments including freight forwarding, transportation and warehousing. Gain earlier insight into potential supply issues and trade barriers and better manage network volatility.
Industry Challenges >>
As a logistics service provider (LSP), organizations rely on you to handle one of the most critical aspects of their business. Customer expectations are high, but gross margins for the global LSP industry are falling as the costs of transportation and warehousing increase, competition intensifies and demand remains volatile.

Your ability to effectively manage complex global supply chains across multiple firms is critical to your success, but how do you balance customer service while also addressing the cost pressures that are straining your business?

Kewill Value >>
Imagine the power of gaining greater visibility and control across your global logistics network, multimodal transportation and warehousing, with a common view and comprehensive set of tools to manage it all.

Kewill makes it possible by delivering a single platform to manage, transport, store, trade, comply and integrate — giving you levels of global visibility and control you never thought possible. Kewill MOVE can help you lower costs, better manage network volatility and integrate more efficiently with trading partners, ultimately helping you improve margins and operate more profitably.

Key Benefits

• One platform for managing logistics operations, multimodal transport and warehousing
• Enhanced agility to respond to potential issues
• Greater efficiency and lower costs
• Streamlined customs compliance
• Visibility from order to invoice

"The most important reason for choosing Kewill is the flexibility of the software." – Seacon Logistics
Streamline logistics, transportation and warehousing operations

Manufacturers

Industry Challenges
Global trade has increased the need for effective multimodal transportation and increased the cost and complexity of logistics processes, including regulatory compliance. As a manufacturer, the realities of logistics cost volatility, complex transportation networks, dynamic compliance regulations and growing volumes of data can be overwhelming, and legacy technologies are just slowing you down.

Your global supply chain continues to change and grow, making visibility and agility even more difficult. It’s time to streamline and innovate your global transportation and logistics processes in order to remain competitive and ensure future success.

“With the Kewill software, we saw an immediate increase in capacity. Costs to process orders have decreased as well.” - Kichler Lighting

Kewill Value
Kewill can help you transform logistics challenges into a strategic advantage while at the same time reducing overall costs and streamlining supply chain execution.

By providing a common platform for managing trade, transport, storage and compliance, Kewill MOVE enables better visibility, improved compliance, fewer errors and greater agility. Support for wireless technologies such as RFID and mobile scanners, automatic tracking of customs requirements and multiple deployment options – including Cloud – help streamline your operations. With the Kewill platform, you benefit from lower risk, less hassle, greater control and higher profits for your business.

Key Benefits

- One platform for managing logistics operations, multimodal transport and warehousing
- Central connectivity to all global carriers
- Accurate trade compliance
- Ability to support all major economies and emerging markets
- Visibility across all global shipments
Retailers & Distributors

Industry Challenges >>
Your product volumes are high, your margins are low and the rate at which data is created continues to accelerate. Multi- and omni-channel demands, persistently high levels of stock outs, and the escalating cost of incorrect or missing deliveries continue to plague your business. Your ability to respond quickly to changing market demands is dependent on your access to critical supply chain information at exactly the moment you need it.

Success can only be achieved through seamless execution of your transportation management and logistics processes both internally and with your trading partners.

“"We have a better understanding of what is happening at any moment because we are sharing the same information as our suppliers, meaning we can both improve our efficiency."’’ - JD Williams

Kewill Value >>
The Kewill MOVE platform is designed to accelerate the speed, accuracy and transparency of global logistics, transportation and warehousing and is built to scale to the high-volume, global needs of retailers and distributors.

Gain a holistic view of your logistics network with end-to-end visibility and product tracking across store locations, distribution centers and all of your global delivery channels with Kewill MOVE. By achieving greater control and efficiency across multimodal transportation, warehousing and logistics processes, your business can lower costs, shorten delivery times, better manage inventory and improve collaboration with supply chain partners – all of which contribute to a better consumer experience and higher margins.

Key Benefits

- One platform for managing logistics operations, multimodal transport and warehousing across channels
- Improved efficiency, lower costs and higher margins
- Visibility across all warehousing and multimodal transportation options
- Enhanced agility and responsiveness
- Flexible trading partner integration
